

## OVERVIEW

John is an engineer with over twenty years' project and general management experience in construction, specialist engineering and Facilities Management (FM).

Prior to forming LCMB in 2009, John spent the previous ten years operating as a Main Board and Operations Director within Inviron (formerly ABB Ltd.), a specialist M&E, FM contractor, and Laing O'Rourke, a large construction business.

John has led projects and project teams on a range of buildings with values up to £100m. He has also been responsible for annual FM budgets up to £40m and as a Director has managed businesses with an annual turnover of up to £150m.

John has delivered traditional, design and build, PPP/PFI, GMP and open book, procured projects, in the following sectors:

- Retail
- Education
- Commercial
- Hotels and leisure
- Residential
- Industrial

- Healthcare
- Telecoms and data
- Airports and transportation
- Process sector
- Public sector including Police and MOD.

John is experienced in all phases of the building project life cycle, from inception to post completion operation and he set up LCMB in 2009 to help clients get the best performance from their buildings, both from a financial and an energy consumption point of view. LCMB specialises in:

- Getting the best value out of buildings
- Initiating and managing great project
- Reducing energy consumption
- Reviewing and rescuing poor performing projects.
